Introduction

- This report summarizes the analysis of Dimpho coffee product revenue across Astoria, Hell's Kitchen, and Lower Manhattan.

- The aim was to assess sales performance, identify key revenue drivers, and uncover opportunities to improve profitability.

- With total revenue of R698,812, the findings highlight top-selling products, underperforming categories, and location-based trends to guide future business and marketing decisions.

Purpose of the Analysis

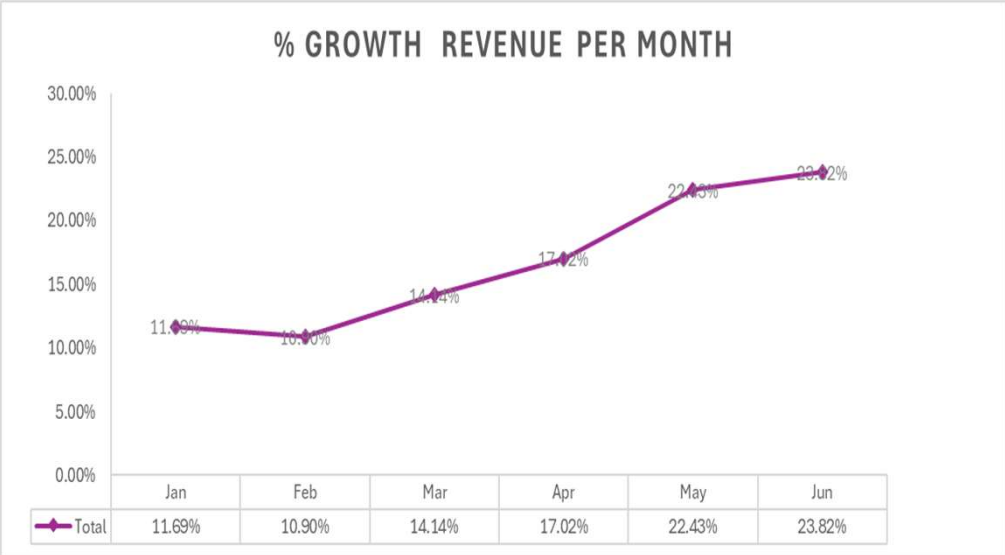
The purpose of this analysis is to provide the CEO with data-driven feedback based on Dimpho Coffee's historical sales performance.

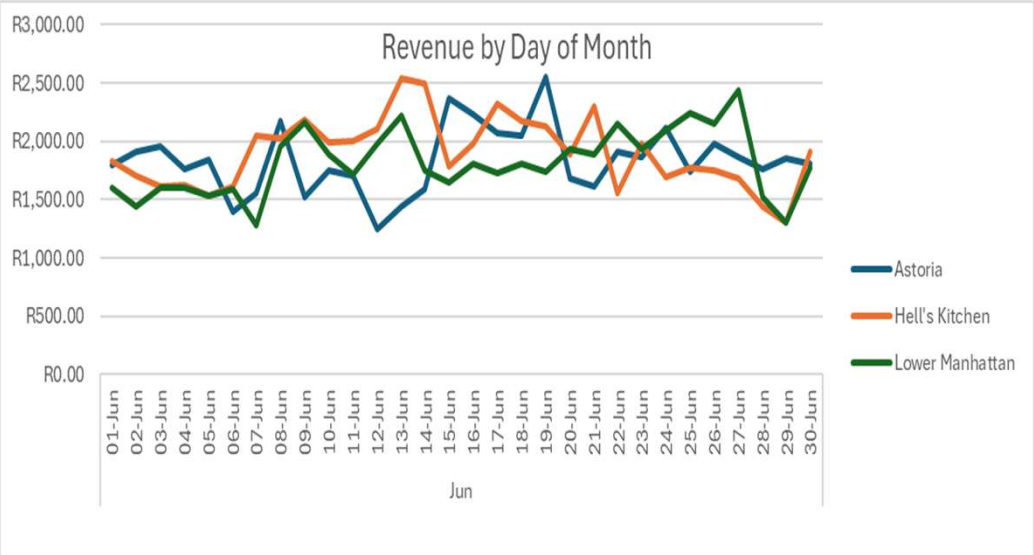
The analyses focuses on identifying trends in product performance, areas for improvement, and opportunities to drive revenue growth across locations and product categories.

Revenue | 6-Monthly Revenue Overview

Insights

- Total revenue for the six-month period, reached R698,812, with an average monthly revenue of R16,468.72.
- After a dip in February, revenue showed a steady recovery from March through June, with June emerging as the peak month. The most significant growth occurred between April and May, with an increase of above 39%.
- Strong performance continued into May and June, contributing 22.43% and 23.82% of total revenue, respectively.
- February recorded the lowest contribution, accounting for just 10% of the total.
- Revenue by Day of Month indicates daily revenue performance before cumulative performance is assessed at the end of month





Suggestions

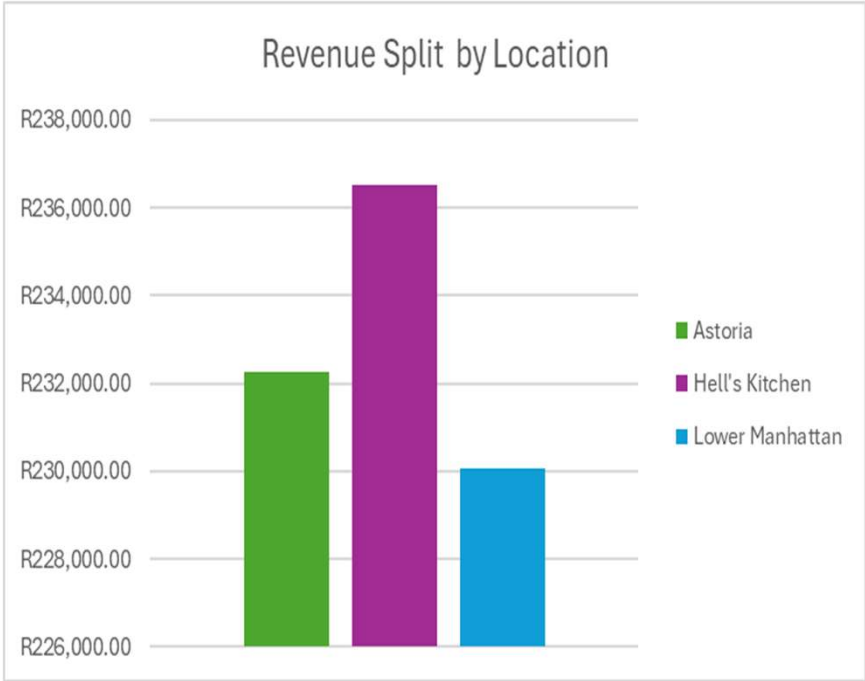
- Analyses the February decline to prevent future dips.
- Evaluate whether June's growth is sustainable.
- Define Q3 strategies such as expansion, promotions and the new products

Revenue | Analysis by Month name

Insights

- All locations performed well in January, with February being the weakest month across all stores
- Revenue showed a sustained upward trend from March to June, with June as the peak month
- Hell's Kitchen consistently led in performance, while Lower Manhattan lagged slightly
- Overall, revenue distribution remains well-balanced across locations. Hell's Kitchen's lead suggests its service offerings or market appeal are slightly stronger, making it a benchmark for other stores

	Jan	Feb	Mar	Apr	May	Jun
Astoria	R27,313.66	R25,105.34	R32,835.43	R39,477.61	R52,428.76	R55,083.11
Hell's Kitchen	R27,820.65	R25,719.80	R33,110.57	R40,304.14	R52,598.93	R56,957.08
Lower Manhattan	R26,543.43	R25,320.05	R32,888.68	R39,159.33	R51,700.07	R54,445.69



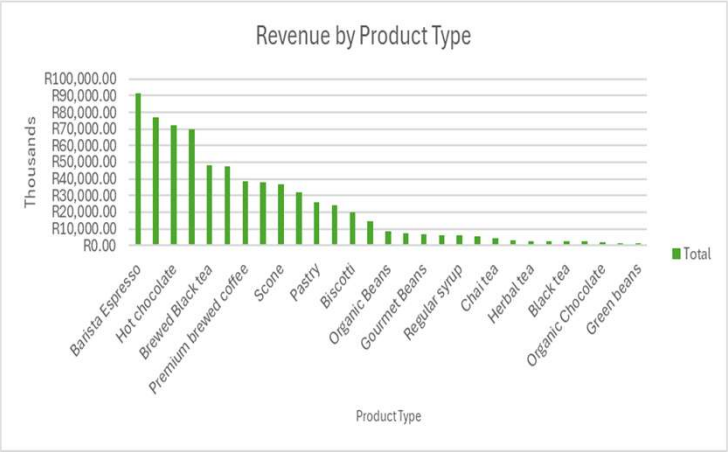
Suggestions

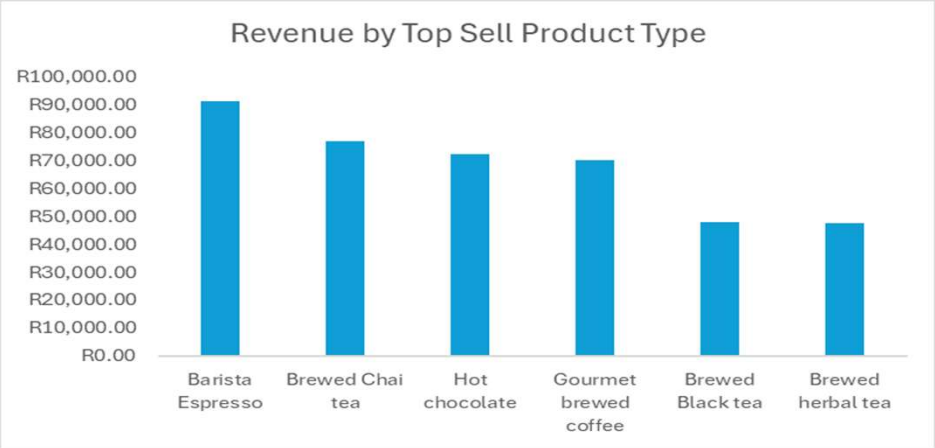
•Investigate all activities as revenue is only an outcome
• Use Hell's Kitchen's model for service and marketing strategies to improve performance at other locations as benchmark
•In Quarter 3 consider the strategies such as promotions, new product offerings, or capacity expansion.

Revenue | Breakdown By Type

Insights

Top 5 Selling Products: Espresso, Chai Tea, Hot Chocolate, Gourmet Coffee and brewed tea generate 58% of total revenue. Premium and specialty beverages, customer preference
Medium selling (15) Products: Scones, Organic Coffee, and Premium Brewed Coffee perform consistently and are served on daily menu. This contribute almost 40% total revenue
Low selling (8) Products: Green Beans, Green Tea, and Sugar-Free Syrup contribute less than 2% total revenue. Hot beverages are core to the business — especially espresso and chai. Food such as scones, pastries, biscotti performs well as complements. Coffee beans, branded clothing and housewares generate much lower revenue



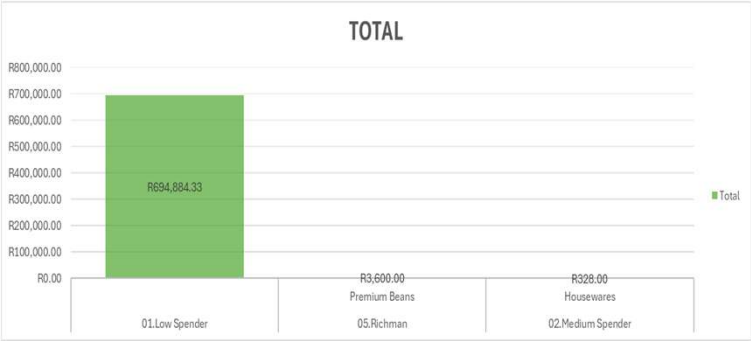


Suggestions

Invest in top performing products by:
Marketing, promotions and inventory replenish for top selling
Evaluate low-performing by :
Assessing products generating minimal revenue for phase out or repositioning.
Use location specific for product trending

Observations:

- Low Spender" dominate the at (~R694k), which is over 99% of the total.
- "05. Richman" and "Premium Beans" are minor contributors each contribute R3,600, and "02. Medium Spender" and "Housewares" only R328, respectively.

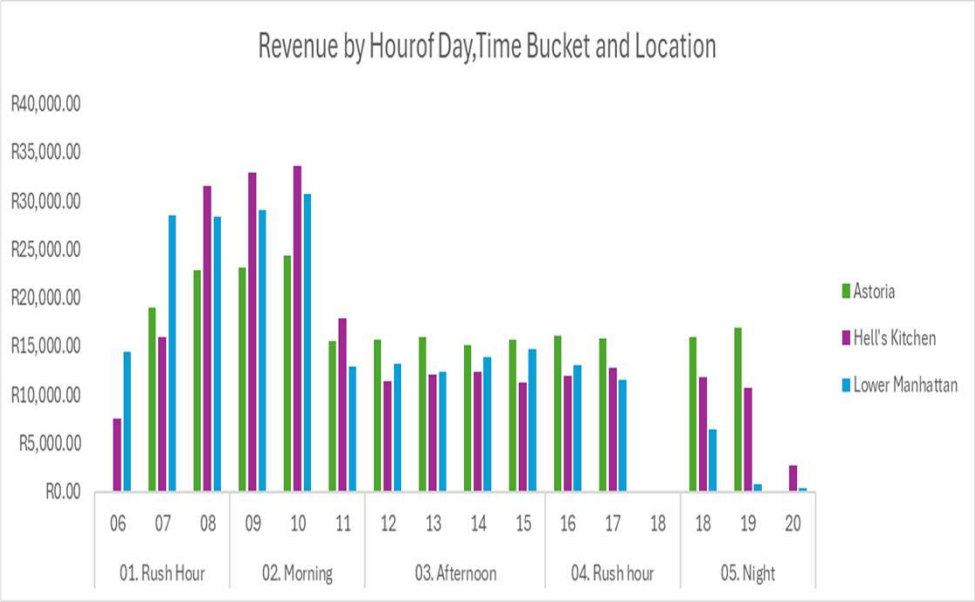


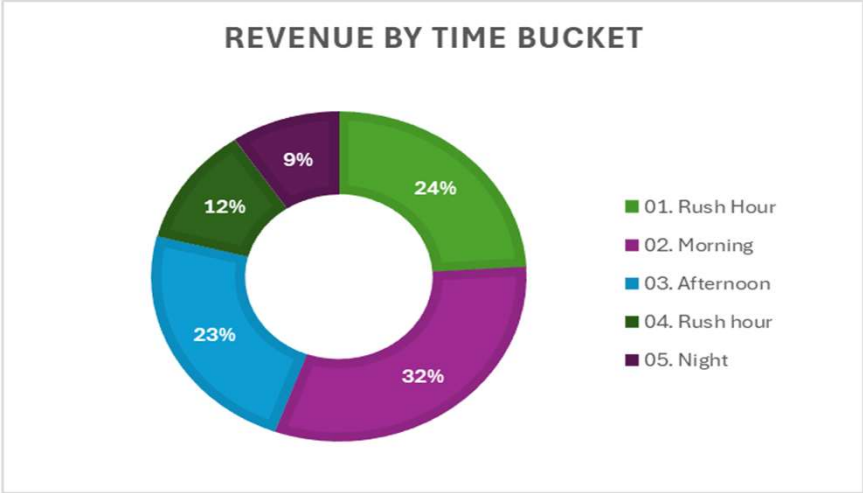
Dimpho Coffee Analysis

Revenue | Analysis by Hour of Day

Insights

Peak Time by total revenue is Morning hour (09:00–11:00) at R220,162.06 total revenue. Highest revenue peak. Strong and consistent across all three locations
Early Rush Hour (06:00–08:00) at R168,126.61 . The Second busiest period specifically strong in Lower Manhattan
Afternoon hour (12:00–15:00) at R163,598.08 closer to rush hour. This s Stable performance across locations
Lower Performing Periods is Evening Rush Hour (16:00–18:00) at R81,290.06 and lastly Night hour (18:00–20:00) at R65,635.52 make these lowest revenue period





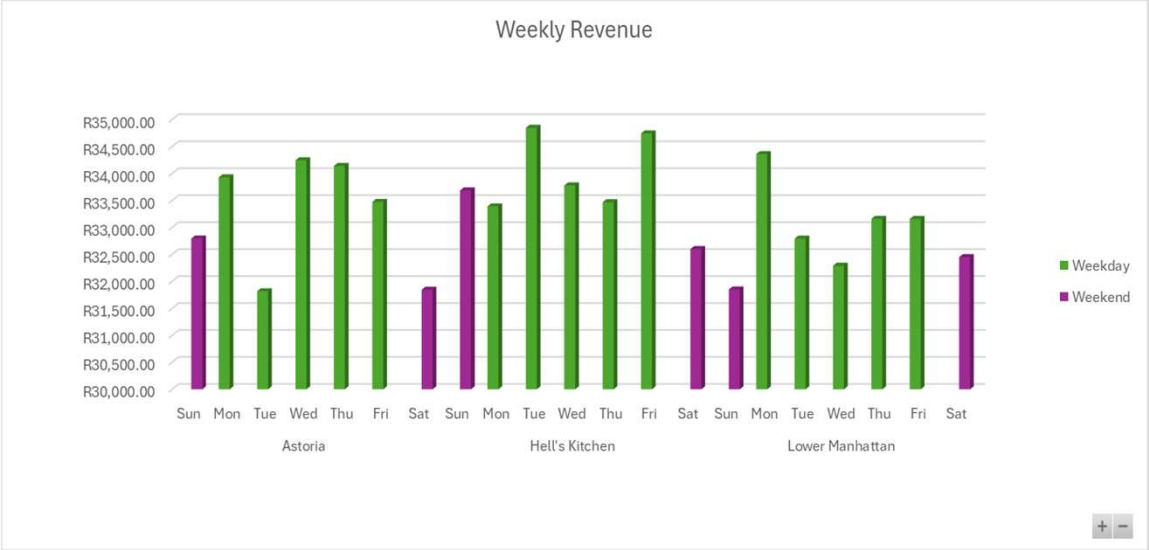
Recommendations

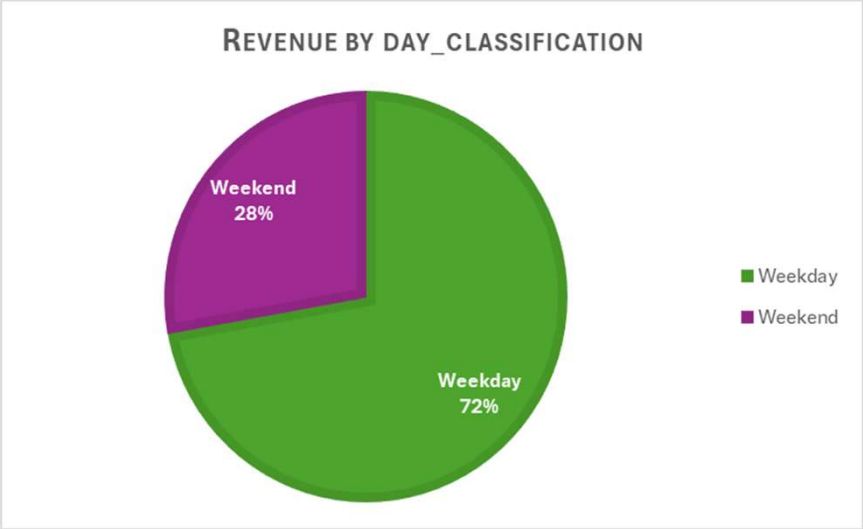
Ensure staffing, inventory, and promotions on Morning and early Rush Hour
Consider evening/night sales for discounts or specials
Potential expansion of morning offerings at Lower Manhattans

Revenue | Analysis by Day of Week

Insights

- Weekday revenues are highly consistent, with a daily average R168K.
- Weekend revenue lower compared to weekdays, daily average R65K
- Monday has the highest total revenue of R101,677
- Friday is the second performer at R101,373 total revenue
- Hellen's Kitchen excels on Tuesday, Friday and Sunday
-





Suggestions

•Grow Weekend Revenue by introducing promotions
•Use Friday to provide limited time offer to boost the average bucket value
•Package combo deals to increase Afternoon & Evening Sales through loyalty points.
•Monitor Bucket Metrics by number of transactions per day/time to identify revenue growth

Revenue | Analysis by Breakdown by Category

Insights

- Product Category consist of 9 category. The top 4 category contribute 88% of revenue
- Coffee and Tea dominate sales by nearly 67% of total revenue, making them the core of the business
- Bakery and Drinking contributing about 22% of the growth through bundling or seasonal offers.
- Remain items contribute below 7% rendering opportunity for growth.
- Location strength differ slight: Hell's Kitchen leaders in coffee, Astoria excel in tea and Low Manhattans best in bakery. 99% of revenue is generated from 7 category , while medium spender and Richman spend less than one percent of the revenue.

	01.Low Spender	Branded 02.Medium Spender	Coffee beans 05.Richman
Total	R694,884.3	R328.0	R3,600.0

Suggestions

- Maximize Core Categories (Coffee & Tea) –consistent taste, pricing & promotions, marketing & branding etc
- Grow Complementary Food Sales – analyse food that goes together
- Expand Retail and Merchandise by showing coffee anywhere in the shop
- Tailor by Location: use the best of each location to maximise profit

Revenue | Breakdown By Type

Insights

Top 5 Selling Products: Espresso, Chai Tea, Hot Chocolate, Gourmet Coffee and brewed tea generate 58% of total revenue. Premium and specialty beverages, customer preference
Medium selling (15) Products: Scones, Organic Coffee, and Premium Brewed Coffee perform consistently and are served on daily menu. This contribute almost 40% total revenue
